One of the most important tips is to break your reading into manageable sessions. Long, uninterrupted reading on a screen can strain the eyes and reduce concentration. Instead of reading for several hours at once, divide your time into shorter sessions with regular breaks. This approach helps maintain focus, improves understanding, and prevents mental exhaustion. Using techniques such as the Pomodoro method—reading for 25–30 minutes followed by a short break—can be particularly effective.

Using bookmarks is another simple yet powerful habit. Most digital reading platforms allow you to bookmark chapters, sections, or specific pages. Bookmarks make it easy to return to important parts of Mychart Johns Hopkins

Everything You Need To Know And More without scrolling or searching manually. This is especially useful for long documents, study materials, or reference-based reading where you may need to revisit certain sections frequently.

Highlighting key points and adding annotations can significantly improve comprehension. Digital highlights allow you to visually mark important ideas, definitions, or summaries. Adding notes in your own words helps reinforce understanding and creates a personalized study guide. Over time, these highlights and annotations turn Mychart Johns Hopkins Everything You Need To Know And More into an interactive learning resource rather than passive reading material.

Adjusting screen settings plays a crucial role in reading comfort. Most reading apps allow you to customize font size, font style, line spacing, and background color. Increasing font size and line spacing can reduce eye strain, while using dark mode or sepia backgrounds may improve readability in low-light environments. Adjusting screen brightness to match ambient lighting further enhances comfort and protects eye health during long reading sessions.
